ADDITIONAL OPTIONS

- » Optional third copy of data replicated over 125 miles away
- » Host your own vault and replicate to our secure facility
- » Customer support packages based upon per incident or unlimited basis

Note:

- CoreVault installation technicians take a consultative approach to software configurations. Each technician is trained in data protection best practices and discusses individual needs with each customer. This ensures the identified data by the customer is correct and the software is configured accordingly.
- On-site installation does not include travel and expenses if required.
