

Choosing the Right Sage Pro Edition

With two Sage Pro editions and 23 modules to choose from, you don't have to worry about outgrowing your ERP system. When your business grows, and you need to use more ERP system features or automate new processes, simply add the appropriate modules. When you need to add users or increase capacity, just move up to a higher edition. Screens and modules are consistent between the editions, and data migration is a cinch-so you can forget about ERP system downtime, and focus on helping your business continue to thrive and grow.

Sage Pro 100

Sage Pro 100 is well-suited for small, growing companies that require a complete, integrated suite of accounting and operations modules. Providing robust features and an easy upgrade path to full source code access, Sage Pro 100 is optimized to deliver maximum efficiency, simplicity, and reliability.

Ideal for smaller companies that demand a stable, full-featured accounting system that supports as many as 10 concurrent users, this edition provides powerful accounting capabilities and a simple migration path to Sage Pro 200 when complete source code availability is needed.

Sage Pro 200

Sage Pro 200 ERP is a comprehensive ERP system business management application built on industry-leading technology. Scalable, customizable and modifiable, Sage Pro 200 features award-winning architecture, complete source code availability, user-customizable toolbars, a variety of add-on solutions, security control, and a full suite of financial management and operational modules.

Sage Pro 200 is designed for mid-sized accounting environments that require a scalable, feature-rich ERP system with powerful analysis and reporting capabilities and unlimited user capacity.
