**Hoffman Estates, IL** – April 10, 2012 – Axis Global Partners, a consulting firm specializing in the implementation and support of business management software solutions for small and medium sized enterprises, helps ProMax Auto Parts drastically improve their warehouse process.

ProMax Auto Parts Depot, Ltd. has been serving auto part retailers in the North American market for over 5 years. As an auto part wholesale company, they offer ceramic and semi-metallic disc brake pads, drum brake shoes, drums, rotors and chassis parts. With a large number of diverse products they operate a 60K main distribution centre on the outskirts of Toronto with a west coast operation in Burnaby, British Columbia.

ProMax was already equipped with a solid accounting system, Sage BusinessVision, however after a sizeable amount of growth and with over one million parts in stock, they needed a Warehouse Management System (WMS) that could help them manage inventory and streamline their business processes.

Dale Robertson, Senior Business Consultant for Axis Global Partners explains, "We implemented Accellos One WMS for ProMax because it could help them meet their specific requirements, and could seamlessly integrate with their Sage BusinessVision accounting program. We have worked with this product since its inception more than 20 years ago and we have accumulated a deep knowledge of the solution throughout the more than one hundred projects in which we have deployed it."

Ramzi Yako, Owner for ProMax reflects, "I have been impressed with how personable, polite and business oriented Axis has been throughout the entire process. They are very knowledgeable and are truly experts in their field. Their technical staff has been a great help to us in getting our system working correctly and efficiently. The entire Axis team has proven to be an invaluable asset to us and we are so appreciative to have them a part of our team."

Axis was able to implement and integrate the solution in less than 3 months with minimal workflow interruption. As a result, ProMax has been able to reduce their error rate, improve productivity and streamline their warehouse management process across the board.

"We assist our clients in leveraging the right technology in order to increase operational efficiency and decrease costs to become more agile, competitive and profitable," comments Dale. "It is our goal to provide clients with the fastest and highest possible return on their software investment, along with outstanding customer service – and this implementation is a great reflection of that."
